

MedGyn Uterine Manipulator

The MedGyn Uterine Manipulator is ideal for laparoscopic tubal occlusion, diagnostic laparoscopy, minilaparotomy, salpingoplasty and fertility exams.

Features & Benefits

- The product is disposable, with 33cm in length and a diameter of 4.5 mm, and has centimeter depth marking
- The sturdy handle is anatomically curved to create better insertion maneuverability and affords optimal manipulation
- Smaller cannula size allows for easier insertion.
- Pear-shaped balloon provides optimal hold and a better seal at the internal OS.
- Intrauterine balloon easily inflates with syringe
- Distal end with inflation valve

022701 Uterine Manipulator/Injector (12/bx)
