Ob/Gyn Professionals

MedGyn Aspiration Kit™ & MedGyn Aspiration Kit IV™

The MedGyn Aspiration Kit and MedGyn Aspiration Kit IV provide simultaneous endometrial curettage and aspiration. Simple, Safe, & Effective. MedGyn's newest, addition Aspiration Kit IV™ comes with a 60cc syringe and a 4mm, 5mm, 6mm, or 7mm flexible curette for convenient use.

Features & Benefits

- The aspiration kit is a device used for diagnostic and therapeutic uterine evacuation and aspiration.
- Each is individually packaged, sealed, sterilized and latex free.
- Provides simultaneous endometrial curettage and aspiration, for comprehensive specimen removal.
- 60cc syringe with a unique locking mechanism prevents back flow and promotes consistent, strong suction.
- When no suction pump is available, the MedGyn Aspiration Kit™ or MedGyn Aspiration Kit IV™ is an ideal, low cost solution.
- Convenient for routine gynecological use.
- Package size: 10/bag

Simplicity

The disposable MedGyn Aspiration Kit™ or MedGyn Aspiration Kit IV™ is an effective and affordable device for achieving uterine aspiration. It requires no anesthesia for use, and only rarely requires a cervical block. It is ideal for routine gynecological procedures in outpatient or office settings.

It features a 4, 5, 6, or 7mm flexible sterile curette that allows for easier introduction while minimizing the risk of perforating the uterine wall. In addition, it reduces patient discomfort usually associated with uterine curettage.

Most importantly, the MedGyn Aspiration Kit™ or MedGyn Aspiration Kit™ IV is efficient and reliable. Its flexible curette bends easily and has sharp slots near the distal tip to allow sampling from even the difficult to reach cornual areas.

- 022514 MedGyn Aspiration Kit™ with 4mm Cannula
- 022515 MedGyn Aspiration Kit™ with 5mm Cannula
- 022516 MedGyn Aspiration Kit™ with 6mm Cannula
- 022517 MedGyn Aspiration Kit™ with 7mm Cannula

- 022511 MedGyn Aspiration Kit IV™ with 4mm, 5mm, 6mm, 7mm Cannula
