

MedGyn Disposable Curettes & Accessories, Vacuum Collection Sets

The MedGyn Disposable Vacuum Curettes are carefully designed and manufactured with care in our laboratories to reduce potential patient trauma. MedGyn curettes consist of a minimum outer diameter for fast, safe and total evacuation by suction of the uterine cavity.

The MedGyn Disposable Vacuum Collection Sets include 6' tubing (either 3/8" or 1/2" I.D.) attached to a control handle with slip ring for finger-tip vacuum control.

Features & Benefits

- Excellent concentricity of the inner and outer walls of the curette eliminates break age.
- Strict quality control procedures assure the highest acceptance rates.
- A wide range of models and diameters (a range of 30 choices).
- Radio sterilized
- Flexible cannula sterilized by ETO

Curettes

Curette Production

- Manufactured by press injection, curettes are automatically transferred into environmentally controlled rooms where they are inspected and shaped as required.
- All curettes are checked visually. This inspection is necessary to eliminate any flaws. The curettes are then "flamed" to round off any sharp edges.
- In the final stage, the curettes are individually packed before being sterilized.

Vacuum Collection Set

Rigid Curved

022106 6mm (50/pk)
022107 7mm (50/pk)
022108 8mm (50/pk)
